SUMMARY

Frontend-focused Full Stack Developer with 2+ years of professional experience building scalable SaaS applications using React.js, React Native, Node.js, Express.js, and MongoDB. Strong expertise in frontend architecture, responsive UI development, state management, REST API integration, and performance optimization. Experienced in building production-grade healthcare, CRM, and recruitment platforms with reusable component systems, authentication workflows, and AI-powered product features.

SKILLS

Frontend: React.js, React Native, JavaScript (ES6+), TypeScript, Redux, React, React Query, MUI, Chakra Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, MongoDB, REST APIs, Authentication, Redis

Tools & Platforms: Docker, Git, GitHub, Clerk, Postman, Groq AI, Figma, VS Code

Other: Full Stack Development, SaaS Platforms, Agile/Scrum, API Integration, Responsive UI

EXPERIENCE

Full Stack Engineer | Galific Solutions | Dec 2024 – May 2025

- Built Doctat, a production healthcare SaaS platform used by clinics and patients using React.js, React Native, Node.js, and MongoDB
- Developed modules including appointments, prescriptions, billing, analytics dashboards, pharmacy workflows, and role-based access
- Built and maintained patient-facing mobile applications with responsive UI, reusable components, and real-time updates
- Collaborated with backend, design, and product teams in agile sprints and delivered production-ready features on schedule

Frontend Developer Intern | Galific Solutions | Aug 2024 – Nov 2024

- Built responsive React.js components and integrated REST APIs using Redux. Promoted to full-time engineer within 4 months based on ownership and performance

PROJECTS

Doctat Healthcare Platform · React.js · React Native · Next.js · Vite [Landing page ↗](#)

- Developed a production-grade healthcare SaaS platform with dedicated modules for Admin, Doctor, Nurse, Pharmacy, Lab, IPD, Billing, and Appointment Management using React.js, React Native, Node.js, and MongoDB.
- Implemented role-based access control (RBAC), real-time patient workflows, and reusable UI components, improving maintainability and user experience across multiple panels.
- Engineered an AI-powered prescription recommendation system and chatbot integration, enabling faster clinical decision-making and streamlined patient management.

ElevateCRM · React.js · Node.js · Express.js · MongoDB · Redis · Docker · Groq AI [Live ↗](#) · [GitHub ↗](#)

- Built a scalable CRM platform using React.js, Node.js, Express.js, and MongoDB to manage leads, sales pipelines, and customer interactions.
- Implemented Redis caching, REST APIs, and Dockerized deployment workflows, improving application performance and scalability.
- Integrated Groq AI-powered insights and analytics features to automate lead evaluation and support data-driven sales decisions.

HireMind · React.js · Node.js · Express.js · MongoDB · Clerk · Groq AI [Live ↗](#) · [GitHub ↗](#)

- Developed an AI-powered recruitment platform using React.js, Node.js, Express.js, MongoDB, and Clerk Authentication for end-to-end hiring workflows.
- Built features including candidate tracking, interview scheduling, onboarding management, and role-based authentication to streamline recruitment operations.
- Integrated Groq AI-based candidate screening and evaluation modules, reducing manual effort in shortlisting and assessment processes.

EDUCATION

Full Stack Web Development — Masai School | Mar 2023 – Mar 2024 [Certificate ↗](#)

BCOM - University of Allahabad | Apr 2020 – Aug 2023
